The professional DECT handset:  
New inside, perfect outside.

# funktel FC5

## Handy, ergonomic, robust

■ The funktel FC5 offers users the perfect industrial handset for harsh everyday conditions: handy, convenient, robust and durable - even in an industrial environment. No matter whether professional voice and messaging functions, sophisticated ergonomics or innovative user prompting are required: the funktel FC5 delivers a convincing solution across the board.

The sturdy industrial housing of the funktel FC5 sits in the hand perfectly and withstands significant loads and falls (tested up to 1.8 m). Thanks to the guaranteed IP 65 protection class, the funktel FC5 is dust- and waterproof and suitable for use outdoors and in harsh industrial environments. The sturdy belt clip ensures secure support and great carrying comfort. The bright 2-inch screen impresses with its crystal clear display, even under unfavorable lighting conditions. With its clear symbology, the operating logic ensures intuitive operation without any guesswork. The strong vibrator for hazard alarms and a discrete emergency call button guarantee the highest level of functionality in everyday use.

The funktel FC5 supports all features of Integral and funktel communication systems. When funktel handsets belonging to the FC1 / FC4 / FC11 or D3 / D11 Series are swapped, all settings are transferred automatically via the MemCard.

HAC compatibility with all analog hearing aids, hands-free telephony<sup>+</sup> via blue.tooth, headset jack, high-quality earpieces and an efficient speaker at the rear: the funktel FC5 always offers telephony with the best audio quality - even in noisy and demanding situations.

<sup>+</sup>) funktel recommends Plantronics Explorer 55 and Sennheiser MB Pro 1.

### Sturdy clip and side-mounted emergency call button

Safety first: The sturdy, screw-fastened clip ensures that the funktel FC5 always has optimal support. The discrete emergency call button significantly increases the level of safety.

### MemCard

Network information and contact list data of older-generation devices are copied automatically from the MemCard (optional) to the internal memory. This enables devices to be exchanged easily, even without the intervention of a technician.
